

Wholesale SIP Trunking

The reliable option for Business Voice - enabling reliable telephony service over a physical or virtual end-customer data connection.

Wholesale SIP Trunking (WSIPT) delivers reliable business voice service across both inbound and outbound calls using Irish geographic telephone numbers via your IP data connections to one or multiple sites.

You can share network capacity and telephone numbers across multiple sites, delivering efficiencies as well as enabling automatic disaster recovery and business continuity.

It offers a fully automated order and provisioning process, delivered via a graphical user interface (GUI) or application programming interface (API) into our systems.

Designed for maximum flexibility, BT SIP Trunking is designed to keep you and your customers in compliance with Irish regulatory obligations while offering reliable low-cost access to the PSTN.

Why choose BT Ireland?

Local expertise and support

Our local teams are on hand to support you with our expertise and experience in WSIPT and fixed line telephony.

Fully automated end-to-end order and provisioning

Our end-to-end online ordering and provisioning capabilities are simple to use, saving you time.

Trusted partner

With over 100 years of experience in telecoms, we are a reliable and trusted partner in fixed line telephony and local numbering.

Features and benefits of WSIPT

Future focused product

WSIPT facilitates end customer migrations from soon-to-be-legacy ISDN business voice services.

Cost efficiencies

WSIPT is a lower cost solution that delivers efficiencies not readily available via traditional PSTN and/or ISDN access.

Compliance

For your peace of mind, the service facilitates best in class compliance with legal and regulatory obligations.

Simple pricing structure

'Pay as you grow' pricing makes budgeting predictable, empowering you to deploy flexible commercial models.

Bridges technology

WSIPT bridges legacy and next generation technology, so you can keep your existing handsets and still benefit from the lower costs and enhanced functionality associated with IP voice services.

Choice of access

Multiple access options mean WSIPT can be delivered to your customers both physically and virtually, giving them choice and control.
